

Land Volciano € 590.000 Ref. 280

280 sq.m.

Building lot of approx. 1400 m2. located in a quiet and reserved area. The land is located in a privileged position with a view of the lake, in an environmental context characterized by the presence of a few high-level properties, all surrounded by a lush green area.

The project, which has already passed through the necessary municipal and landscape authorizations, was ratified by the superintendence and then approved as can be better understood from the attached renderings and provides for the construction of an exclusive single villa of approx. 200 approx. on one level. The project, characterized by modern and essential lines, in which the relationship with the environment prevails through the strategic use of large windows, conceives large living spaces that allow you to follow the path of the sun with the help of spectacular sliding windows. A dining area and kitchen conceived as an open space, 4 double bedrooms, 3 bathrooms and large porches make the livability of the villa unique. In addition to what has been described, the presence of a quadruple garage with laundry and cellar in the basement makes the usability of the house without compromise.

The swimming pool (which has the utility rooms available), positioned near the living area and a beautiful terrace overlooking the living space, complete the elegant functionality of this elegant project, developed for a land that enjoys a truly remarkable lake view.
